Digital & Technology Solutions Degree Apprenticeship

Achieve your 'trailblazer standard' BSc (Hons) Digital & Technology Solutions Degree through TES, in partnership with Stafford University.

Enjoy a hands-on learning experience, including on-the-job training and academic teachings with a fun and vibrant team.

totalenterprisesolutions.co.uk

What's involved in an Apprenticeship Scheme with TES?

You'll have an unrivalled opportunity to earn and learn whilst obtaining your degree qualification.

To make sure you get the right mix of theory to support what you're working on, the course is split 20% academic and 80% on-the-job. We also know that everyone learns in different ways, both by exams and day-to-day mentoring from experienced industry professionals.

What are the perks?

As a (part-time) student we don't want you to miss out on any of that fun!

You'll have a student card and access to all the university's facilities. You might not be on the university site all the time, but you'll still be part of the engaging on-campus and virtual community.

And best of all, you receive a monthly wage and the university tuition fees are paid by a combination of government grant and the employer... so no student debt!!

Is this right for me?

Are you looking to work in a graduate-level tech role? Are you eager to learn and try out new things? Do you want your ideas to be listened to and be a driving force in a fast-growing, evolving business at the forefront of its game?

If this sounds like you, then this Apprenticeship Programme is what will help you leapfrog into your dream job!

What will my day be like?

No day is the same, but that's what makes this course so engaging and valuable.

You'll be based at the state-of-the-art facilities on the Stoke-on-Trent campus and at TES Head Office in Rugeley. You'll meet many different people, work on real world IT projects with a lot of autonomy, helping build confidence for when you move into the full-time, working environment.

> What am I going to learn?

As Microsoft Gold Partner, TES and Staffordshire University are ideally positioned to give you the best training in digital technology solutions.

You will be exposed to the full Microsoft 365 Suite and Cloud Technologies, ensuring you become an expert in this sector.

And of course, as well as the fancy technical stuff, you'll gain invaluable personable and communications skills that are transferable across the business world.

What qualifications do I get?

BSc (Hons) Digital & Technology Solutions

That's the title of your degree, but ultimately you will be equipped with the skills and knowledge to take on a number of different roles. Our aim is to open up opportunities by letting you explore where your strengths lie.

What kind of roles might I get?

Software Developer

IT Solution Architect

Business Analyst

Software Quality Assurance

Business Technology Consultant

...and more more!

Jordan Woodward TES apprentice

Coming through the apprenticeship scheme into TES couldn't have been any smoother. It was my first taste of the real working world, not only did I find a job and career path I thoroughly enjoyed and saw a future in.

I also found a family, a collective of people that are entirely aligned with my values as a person and my aspirations for my career. A collective I absolutely love working with every single day."

How to apply

Email one of our friendly team at TES today
careers@totalenterprisesolutions.co.uk

TES can guide you through any questions you might have, making it a simple and straightforward application process.
